To let you know that I personally and everyone I have spoken to (about 35 people to date) do not support any part of government involvement in what our 401Ks/IRAs are invested in. We definitely want to maintain the current control we have over "our" money. Also, investment in a large percentage of bonds is no way to stay up with inflation and allow your money to grow until you die. Some comments I received are "Over my dead body", "No way in HE**", "I'll move to Canada first". I think you get the message.

Bill
